## HARNESS THE TRUE POTENTIAL OF YOUR TRUCK FLEET

With almost 40 years' experience of innovating reliable material processing equipment, MMD has developed a mobile feeder solution that overcomes the inherent problem of intermittent loading typically seen in truck and shovel operations.

Accepting direct loads from excavators, screens or Mobile Sizing equipment, the Fully Mobile Surge Loader stockpiles material and delivers a regulated flow to the truck fleet. This increases truck and shovel utilization and provides a system capacity improvement of up to 25%.

### BENEFITS

- Optimises shovel production capability
- Increases truck utilization
- Improves truck fill factors
- Reduces truck body wear
- Lower cost per tonne
- Small capital investment for high reward

Further increase truck filling factors and efficiency with the successful MMD Mobile Sizer
