INTRODUCTION

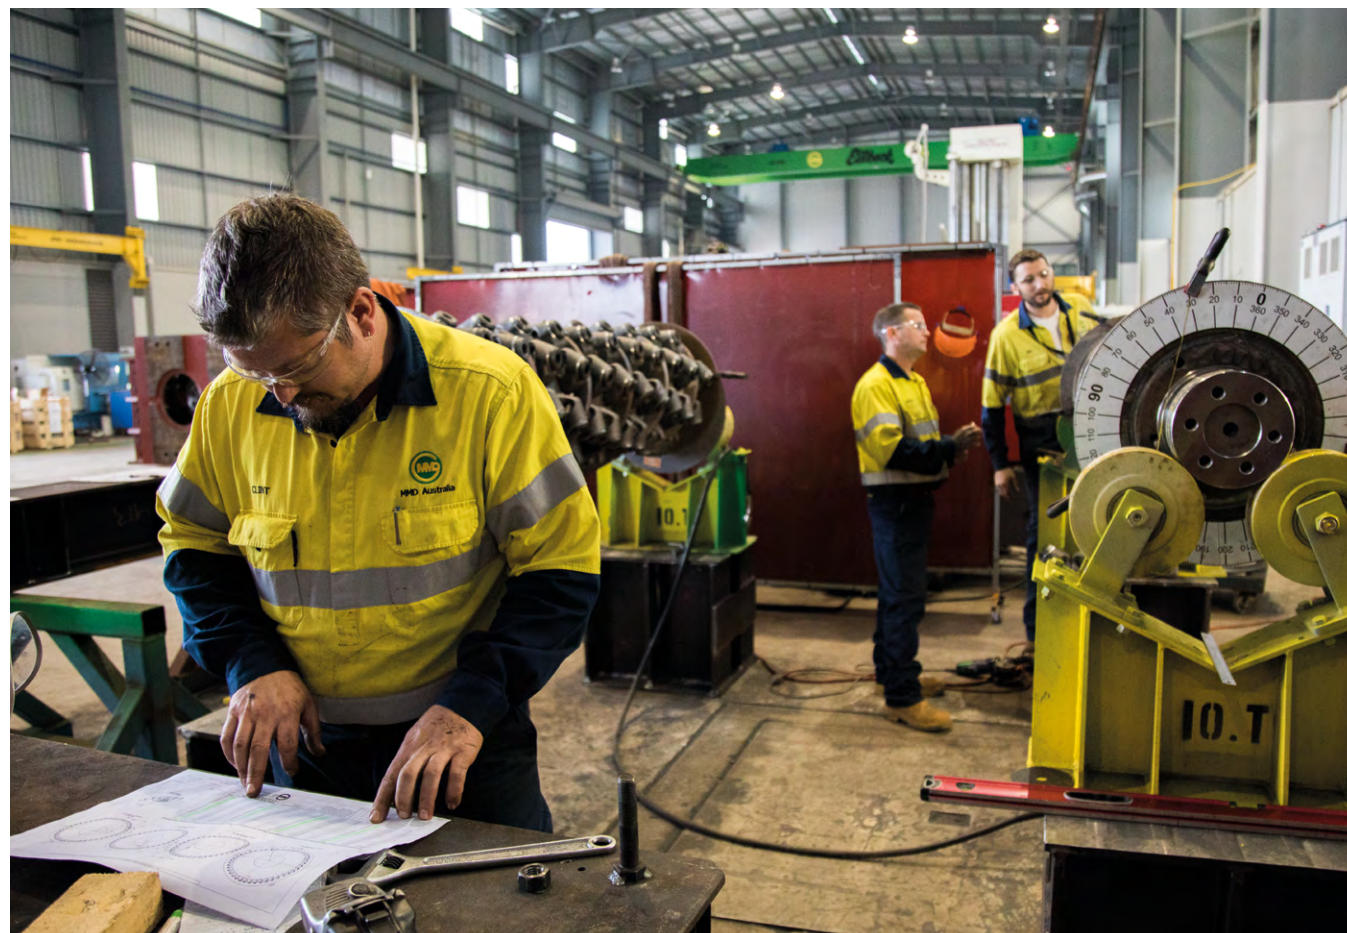

MMD Australia Pty Ltd

MMD Australia Pty Ltd specialise in the design, manufacture and supply of mineral processing solutions. Having been in operation since 1982, MMD Australia has grown from strength to strength and now employs a multi-faceted team across four facilities working together to efficiently service the mining, quarrying and recycling industries.

From coal to iron ore, MMD are a dynamic company that has successfully fulfilled both large and small contracts alike, for some of Australia's biggest mining companies. From single machine installations to large multi-million dollar projects, MMD offer the latest innovations in mineral processing technology.

MMD Australia offer:

- A safety culture that promotes zero harm
- Proven design capability within the minerals processing industry
- State of the art design for constructability, modularity, operability and maintainability
- Proven project management capability
- Quality assurance and control utilising MMD Australia's proprietary completions system
- ISO 9001, ISO 14001 & OHSAS 18001 accreditation with established systems, policies, procedures and an outcome focused culture that promotes continuous improvement

What Services Do We Offer

- Installation and commissioning
- Project services
- Field service
- Spares
- Overhauls and repairs
- Troubleshooting
- Maintenance contracts

Brisbane Production Facility

Land Size

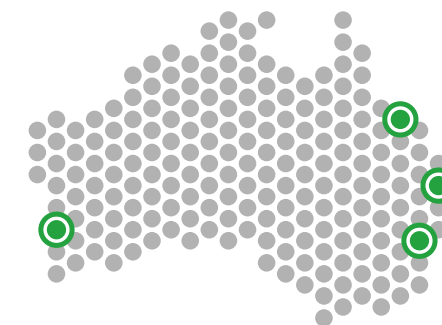

- 14,777m² site
- 4,250m² under cover

Machinery & Equipment

- 100 tonne overhead lifting capabilities
- 6m CNC lathe
- 4m CNC lathe
- CNC turning centre for bolt manufacture
- 10m bed floor borer
- 2m bed horizontal borer
- Radial drill
- 15m x 15m retracting roof spray booth
- 5 fully equipped welding bays
- Wash down service bay
- Precision assembly beds

FACILITIES

Our Locations and Facilities

MMD Australia operates from state of the art facilities based in Brisbane, Mackay, Singleton and Perth. Each facility is equipped with the latest in manufacturing technology, enabling MMD Australia to deliver complex components, finished to the highest international standards.

Main Headquarters - Brisbane:

The facility located in Narangba is at the heart of MMD Australia Pty Ltd, providing a central hub for project development, design and manufacture. Narangba is also fully equipped for overhauls and includes a spare parts store.

MMD facilities are conveniently located close to major transport networks for quick access and machine turnaround. For large repairs and overhauls, dedicated workshop space can be planned to coincide with site shutdowns and maintenance schedules.

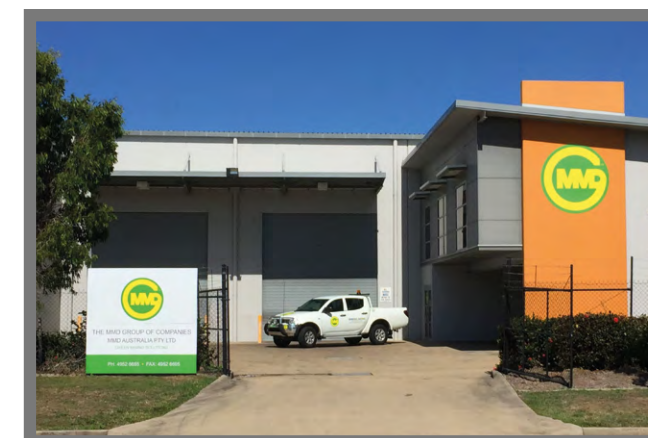

Perth Sales and Service Facility:

Fully equipped for overhauls and incorporates a spare parts store. Maintenance coordinator, service technicians, trades & trade assistants.

Singleton Service Facility:

Fully equipped for fabrication, overhauls & incorporates a spare parts store. Maintenance coordinator, service technicians, trades & trade assistants.

Mackay Service Facility:

Fully equipped for overhauls and incorporates a spare parts store. Maintenance coordinator, service technicians, trades & trade assistants.

SUPPORT

Optimising Performance

As the Original Equipment Manufacturer, MMD provides OEM trained Sizer service technicians for all maintenance, both on and off site. MMD service crews understand the equipment inside out and have the skills and experience necessary to ensure your machines operate efficiently and effectively. The utilisation of our specialised service teams ensures full customer satisfaction, safe in the knowledge that their assets are serviced by the best technicians to OEM standards and specifications. MMD's service teams have an excellent safety record, and are highly regarded by some of Australia's largest mining companies.

MMD can undertake and assist with the planned maintenance of all MMD supplied products, with service teams available for all aspects of customer support; from routine site service and adjustments, full shaft change outs, wear component replacements, hard facing, breaker bar adjustments, as well as full installation and commissioning.

Benefits of MMD Service & Support:

- Access to the latest developments in wear parts, materials and wear resistant processes – increasing runtime & reducing cost per tonne
- Predictive wear analysis enabling implementation of planned maintenance programmes
- Monitoring of key areas to identify and prevent potential issues before they arise
- Fully trained Sizer service technicians
- Rapid mobilisation – 24 hour response available
- Local stock holding and management
- Permanent on site MMD service containers (available with service contracts)
